<b>HB48</b> w/ Adjustable Thermostatic Controller	48 cu.ft. / 1.36 cu. m	3'x4'x4' / 91cmx122cmx122cm	120V	1120	9.33	40 lbs / 18 kg
<b>HB64</b> w/ Adjustable Thermostatic Controller	64 cu. Ft / 1.81 cu. m	4'x4'x4' / 122cmx122cmx122cm	120V	1440	12.00	46 lbs / 20 kg

Powerblanket Hot Box is the most efficient method for heat soaking temperature sensitive items including cold patch asphalt, roofing materials, paint, caulking, food products, and job site materials. Utilizing GreenHeat Technology, the Powerblanket Hot Box enclosure creates a heated environment that is easily maintained with an adjustable thermostat. Create, control and maintain a heated environment for fast and effective heat soaking in.

Contact us for heated wraps that deliver a barrier of protective heat to pipes, hoses, drums, buckets, and valves. Pipeline repair can continue without interruption or fear of frozen lines. Fluids can be heated and maintained in even the coldest weather conditions.

Thaw Frozen Ground, Cure Concrete, Tote Heaters
