Is your Business prepared for **WINTER?**
Winter Slip/Fall Injuries - Are Your Employees Protected?

Cold weather simply cannot be avoided in Canada, so for business owners, it is important to make sure every base is covered as far as winter safety is concerned. HeaTTrak helps ensure that accidents related to winter weather are reduced. HeaTTrak protect access ways and also insures your business is well presented to the public.

While salt and ice melt chemicals are sometimes used, they can get tracked along and created addition slip hazards inside the facility. Rock salt and some chemical de-icers can damage and pit concrete steps over time and cause environment concerns.
